Highlights

High Pixel Density Display
The very best high-density screen shows off your treasured photos with the same 'real life' rich detail and vibrant colours as high-quality prints.

imagen technology
imagen is exclusive Philips photo enhancement technology that automatically analyses your photos to correct colour and adjust for optimal contrast: imagen separates colours to avoid "crosstalk", adjusts brightness distribution for great visual contrast and corrects Gamma for colour accuracy.

4:3 perfect frame ratio
Philips digital PhotoFrame ensures your photo is displayed in 4:3 ratio for the best viewing experience.

RadiantColor
RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the colour on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.

Multiple-photo collage effect
It's a slideshow effect to show photos in collage form, which automatically and randomly compiles different photos together, eliminating unattractive borders that may result from photos that are smaller than the screen size.

Viewing photos in USB flash
A USB connector for easy viewing and sharing of photos stored on a USB flash drive.

Auto on/off display
A timer turns PhotoFrame on and off at the times you choose, reducing energy consumption for the sake of our environment and saving up to one third of your PhotoFrame energy costs.

Auto orientation
Automatic landscape/portrait recognition employs a sensor that recognises PhotoFrame orientation and displays each photo in its proper mode.
